ANSWER 15 OF 27 CA COPYRIGHT 2005 ACS on STN L4 · AN 81:54118 CA Entered STN: 12 May 1984 EDTreating waste waters containing fatty acids of their salts with ΤI cement of calcium carbonate IN Tsuji, Takao; Wakamiya, Katsuhiko; Katsumi, Mamoru PA Kao Soap Co., Ltd. Jpn. Kokai Tokkyo Koho, 2 pp. SO CODEN: JKXXAF DTPatent LΑ Japanese INCL 91C91; 13(9)F2 60-2 (Sewage and Wastes) Section cross-reference(s): 46, 58 PATENT NO. KIND DATE APPLICATION NO. ∠ PI JP 49023450 A2 19740301 JP 1972-63904 19720626 PRAI JP 1972-63904 Α 19720626 CLASS PATENT NO. CLASS PATENT FAMILY CLASSIFICATION CODES ----_____ _____ JP 49023450 INCL 91C91; 13(9)F2 A waste water containing RCO2M (where R is a saturated or unsatd. C10-20 alkyl, and M is an alkali metal, H, or NH4) is treated with cement and(or) CaCO3. Thus, worn white shirts (20 kg) were washed with 50 l. water in which 160 g of Na stearate soap was added. Washing was carried out in a rotary drum washer at 60° for 15 min. The waste water (COD 1660 ppm) was mixed with 1% portland cement, and filtered.

The filtrate contained soap 69 ppm and COD 1260 ppm.

ST soap wastewater treatment cement; calcium carbonate treatment wastewater; sodium stearate soap wastewater treatment; fatty acid wastewater treatment
